The duration of phosphate rock reserves will also be impacted by the decreasing quality of the reserves, the growing global population, increased meat and dairy consumption (which require more fertilized grain for feed), wastage along the food chain, new technologies, deposit discoveries and improvements in agricultural efficiency and the recycling of phosphorus.

Phosphorus: Essential to Life—Are We Running Out? - State of the Planet

There is a clear scientific answer to the question “When does

Download File PDF 2013 Life Sciences March April National Paper Grade 12

human life begin?" Let us consider the various possible scientific answers to that question. One answer (as given above) would be that the fertilized egg or the embryo or the fetus up to a certain age is not yet a human being and in fact is a part of the mother's body.
