The life cycle characteristic of bacteria is termed haplontic. This

## Online Library A Life In Parts

term refers to the fact that it encompasses a single generation of organisms whose cells are haploid (i.e., contain one set of chromosomes). The one-generational life cycle of the higher animals is diplontic; it involves only organisms whose body cells are diploid (i.e., contain two sets of chromosomes).

Mongolia, landlocked country in north-central Asia. Its remarkable variety of scenery consists largely of upland steppes, semideserts, and deserts, though in the west and north are forested high mountain ranges alternating with lake-dotted basins. The capital, Ulaanbaatar, is in the north-central part of the country.
