### Addiction And Choice Rethinking The

That is, addiction is not compulsive drug use, but it also is not rational drug use. Several empirical choice principles predict the possibility of relatively stable yet suboptimal behavior. They include the matching law, melioration, and hyperbolic discounting (e.g., Herrnstein, 1990; Ainslie, 1992).

### Addiction and Choice: Theory and New Data - PMC

Addiction is a neuropsychological disorder characterized by persistent use of a drug despite substantial harm and adverse consequences. Repetitive drug use often alters brain function in ways that perpetuate craving and undermine (but do not negate) self-control. This phenomenon—drugs reshaping brain function—has led to an understanding of addiction as a brain disorder with a complex ...
