Assessment Chapter Test Waves

To say that an assessment is a good assessment or that a task is a good task is like saying that a medical test is a good test; each can provide useful information only under certain circumstances. An MRI of a knee, for example, has unquestioned value for diagnosing cartilage damage, but is not helpful for diagnosing the overall quality of a ...

To determine this, doctors may also test stretch reflexes in the triceps muscle and the Achilles tendon (ankle-jerk reflex) and compare results. The Achilles reflex is a monosynaptic stretch reflex similar to the patellar reflex. In the Achilles reflex, the hammer taps the Achilles tendon while the foot is dorsiflexed, and the foot, in response ...
