tldr Summary—pretty lights, no shadows, more FPS, simple esp file, no ini or cfg tweaking Intro—If your computer spec lurks somewhere near or below the edge of the recommended minimum system requirements you have probably noticed that the option to disable shadows is not offered in the launcher, and consequently may have noticed that the low quality shadow settings look like garbage ...

Colorful Lights - No Shadows - More FPS at Skyrim Nexus ...

Right now the scene should look too bright. This is because all three lights are adding color to the scene. This is why the demo uses a CanvasModulate in the scene. The CanvasModulate multiplies the entire viewport by a specific color. Add a CanvasModulate to the scene and set its color to rgb(70, 70, 70).This will make the scene sufficiently dark to see the effects of the lights distinctly.
