Gao Yin, William Herfel, in Philosophy of Complex Systems, 2011. 1.2 Chaos Theory. Chaos theory has had an enormous impact on all sciences and on popular culture as well. Thus it is not surprising that ecology has been influenced by its results. The study of deterministic chaos dates back at least to the "homoclinic tangles" 7 Poincare discovered in his solutions to the three-body problem.

René Thorn is the author of catastrophe theory. 29 This theory is akin to chaos theory, but it was constructed from the study of singularities, ie, continuous actions that produce discontinuous results. Catastrophe theory is interesting in that it places much emphasis on explanation rather than measurement.

Indeed, parallels have even been drawn between Lewin's work and the work of complexity theorists (Kippenberger, 1998a). Back (1992), for example, argued that the formulation and behaviour of complex systems as described by Chaos and Catastrophe theorists bear striking similarities to Lewin's conceptualization of Field Theory. Nevertheless ...

Kurt Lewin and the Planned Approach to Change: A Re-appraisal

Chaos, Complexity, and Criticality. These are three different theories that have all arisen in the past 40 years as our understanding of systems theory has grown. What they have in common is that they describe system behavior that appears to be non-rational and random; but becomes somewhat comprehensible when you understand the larger system at ...

The idea that God created a useless and shapeless earth is an uncomfortable position for some conservative theologians, and this leads them to the gap theory, or an old-earth perspective. According to conservative proponents of the gap theory, Genesis 1:1 describes the original creation of God—perfect in every way. Then, between verses 1 and ...
