One implication is that muscles in a single anatomical group (e.g., the muscles that swing a leg) do not necessarily share a common mechanical function (Ahn & Full, 2002). The implication, stated more generally, is that redundancy in a multiple muscle group may represent diversity in muscle function.

Nature of Motor Control: Perspectives and Issues

This chapter focuses on the study of human motor control that can have practical benefits in sports, in medicine, in the home, and in the workplace. Research on human motor control focuses on the control of movement as well as the control of stability. Robots reflect our understanding of human motor control. Robots are still relatively
