Time geography - Wikipedia

Unofficially, it is believed that the death toll is even higher and that the Myanmar government intentionally undercounted the dead to minimize the harm to its image and reputation. While we do not know for sure what happened, it is certainly the case that human factors can play a large role in the magnitude of disasters.

Carbon Cycle | A Level Geography

The coast can be seen as a system in order to help to understand the processes and interactions involved. In theory, the inputs, processes and outputs work together to create coastal equilibrium. However, as we will see in this unit human actions affect the state of equilibrium within the coastal system. Coastal landscapes are open systems.
