A piezoceramic BaTiO₃ material that is difficult for 3D printing was tested with a homemade laser-based stereolithography (SLA) setup. The high light absorbance of BaTiO₃ in the spectral range of 350–410 nm makes this material hardly usable with most commercial SLA 3D printers. The typical polymerization depth

The SARS-CoV-2 genome encodes two polyproteins, pp1a and pp1ab, and four structural proteins (6, 7). The polyproteins are cleaved by the critical SARS-CoV-2 main protease (M pro, also referred to as 3CL protease) at 11 different sites to yield shorter, nonstructural proteins vital to viral replication (8, 9). The coronavirus M pro is a

Johann August Ephraim Goeze originally named the tardigrade kleiner Wasserbär, meaning "little water-bear" in German (today, they are often referred to in German as Bärtierchen or "little bear-animal"). The name "water-bear" comes from the way they walk, reminiscent of a bear's gait. The name Tardigradum means "slow walker" and was given by
