of a vehicle differs greatly between a manual transmission car and an automatic transmission car. A manual car is recognisable from the inside, as it contains a clutch pedal, which is used to change gears, as well as a gear shift stick between the two front seats, which offers full control of the car and between 5-6 gears and reverse.

Manual vs. Automatic Car Transmission: Which is Best?

Without getting too technical, the main difference is that automatic cars don't have a clutch pedal. You also have a simplified gearbox. Manual transmission cars have five or six gears, plus reverse, giving you full control over how the car performs. Automatic cars tend to have four modes: Park - P. Reverse - R. Neutral - N. Drive - D
