Before a scientific paper is published in a journal, it is usually peer-reviewed. The aim is to make sure that the research is reliable and credible.

What is 'peer review' for a scientific paper? - BBC ...

Peer review is generally considered necessary to academic quality and is used in most major scholarly journals. However, peer review does not prevent publication of invalid research, and there is little evidence that peer review improves the quality of published papers.

Peer review - Wikipedia

From a publisher's perspective, peer review functions as a filter for content, directing better quality articles to better quality journals and so creating journal brands. Running articles through the process of peer review adds value to them. For this reason publishers need to make sure that peer review is robust.
