The Neolithic Revolution, or the (First) Agricultural Revolution, was the wide-scale transition of many human cultures during the Neolithic period from a lifestyle of hunting and gathering to one of agriculture and settlement, making an increasingly large population possible. These settled communities permitted humans to observe and experiment with plants, learning how they grew and developed.

Came in here to suggest this. If you're interested in a much broader book that covers lots of topics, including religion, Peter Watson's Ideas: A History of Thought and Invention, from Fire to Freud is pretty interesting. Focuses less on the history of specific religion and more on the origins of ideas like polytheism, monotheism, the persistent soul, etc.

Rated 4 out of 5 by Salty Dawg from Good histyoric information The first two introductory lectures were a little dry, but after that each lecture had some very interesting historical facts and theories. This was very educational and informative. I only wish Dr. Brier had used more pictures and/or graphs. This series was produced in the late 1990's and there have been many more discoveries ...
